УПРАВЛЕНИЕ ИГРУШКОЙ

Вперёд/назад

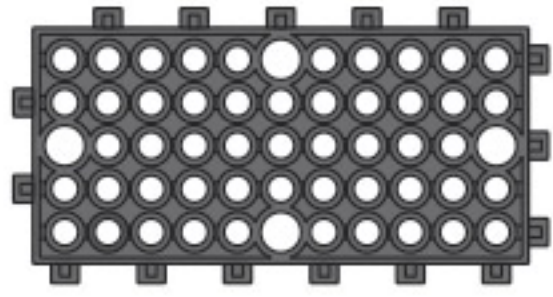

Влево/вправо

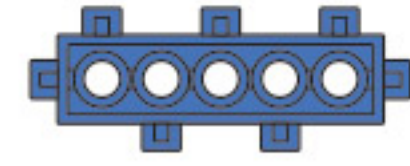

С помощью пульта вы можете управлять движением игрушки вперёд/назад и влево/вправо. Для этого нажимайте соответствующие стрелочки.

Кнопка F4 – при первом нажатии установка соединения с игрушкой. Следующее нажатие – прерывание связи. Повторное нажатие возобновляет управление (работает по принципу Вкл./Выкл.).

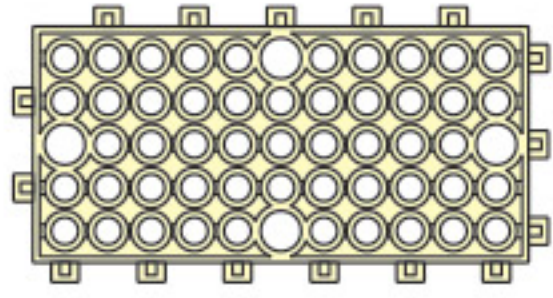

Кнопка F5 – включение инверсии: кнопки начинают работать наоборот (например, при нажатии стрелки «влево» игрушка начинает двигаться вправо). Нажатие F4 отключает функцию.
