Примеры крепления разные варианты адаптеров

Hook (Крючок) 1 	2 	3 
Claw Type Arm (Клешня) 1 	2 	3 
Bayonet arm (Штыковой замок) 1 	2 	
Hook (Крючок) 1 	2 	
Side pin Male pin arm (Боковой штырь) 1 	2 	3 
Top Lock Type Arm (Верхний замок) 1 	2 	3 
Push button (Кнопка) 1 	2 	
Pinch tab (Боковой зажим) 1 	2 	3 

Содержание

Компания AIRLINE представляет широкий модельный ряд каркасных и бескаркасных щеток.

Для всех щеток были специально разработаны адаптеры с помощью которых становится возможным использовать их в подавляющем большинстве существующих креплений и соответственно сделать подходящими на 99% автомобилей.

При разработке данных щеток большое внимание уделялось качеству и подбору материалов из которых производится продукция. Основываясь на проведенных испытаниях было принято решение, что для каркасных щеток будет использоваться натуральная резина, а в бескаркасных – синтетическая. Оба вида резины производятся по эксклюзивной anti-age технологии с использованием озона. Вся используемая резина имеет графитовое покрытие что обеспечивает низкое трение и бесшумную работу. Что касается металлических частей щеток, все они сделаны из стали и покрыты цинком с использованием метода гальванизации (металлопокрытие электрическим способом).
